
Epic Beaker Update #9 Post Go-Live Changes

Dear Regional Pathology Services Clients,

Saturday June 6, 2026, Nebraska Medicine/UNMC successfully transitioned to the Epic Beaker Laboratory Information System (LIS).

As we move through post go-live stabilization, you may still experience temporary delays in result reporting and variations in result formats for select tests. Please be assured that critical testing continues to be prioritized, and all workflows are being closely monitored to minimize disruption.

This transition impacts all laboratory processing systems, including our billing module. We appreciate your patience as we work through optimization and ensure all systems are functioning as expected.

TEST BUILD CHANGES IN THIS UPDATE:

T4T8	ITS	TPEPR	CD3LV	RITUX
TBCSM	MEEP	GIP	TBINTF	BJIPCR

A summary of Epic Beaker changes is available under the Information Systems tab: [Epic Beaker Updates](#).
