

## **Lab Alert: Updated Run Schedules for MMA, Vitamins A, E and D**

Dear Regional Pathology Services Clients,

On June 7, 2021, our Core Laboratory will be making changes to the run schedule of the analytes listed below.

### **MMA Methylmalonic Acid**

- Test code MMAS
- Performed once per week on Wednesday, reported on Thursday
- Currently performed on Tuesday, reported on Wednesday

### **Vitamins A and E**

- Test codes VITA, VITE and VITAE
- Performed on Tuesday and Friday
- Currently performed on Wednesday and Friday

### **Vitamin D, 25 Hydroxy (D2 & D3 by Tandem Mass Spec)**

- Test code VIT25
- Performed once per week on Thursday and reported on Friday
- Currently performed on Tuesday and Thursday, reported on Wednesday and Friday

**Please note, it is highly recommended that for screening purposes the vitamin D 25 immunoassay (Test code: VITD) be performed first when screening for vitamin D deficiency. The LC-TMS assay (Test code: VIT25) is only recommended for follow up of patients demonstrated to be deficient by immunoassay.**
